## FEATURES

The Zed Model L-2 is a general purpose thermoformer which is available as a standard vacuum drape former or with the proper options can be manufactured to accomplish all forming techniques including pressure forming, vacuum snap back, bubble immersion, etc. Standard machine features an upmoving platen, while if options are utilized, tooling (form, plugs, etc.) can be mounted on bottom platen, top ram or combinations thereof. The instrument panel swings out for easy tool mounting and machine adjustment. Precision program control insures the performance and reliability of this machine for laboratory or production work.
